

Preventative Roof Maintenance

QUALITY ROOFING SINCE 1958

- Our Preventative Maintenance Program consists of an extensive check list of items to identify potential problems. The correction of these issues will allow you to recognize the full cycle potential of your existing roof system.
- Tip Top Roofing is experienced with EPDM, Built up Roofing, Modified Bitumen, Thermoplastic, Metal and Shingles. This knowledge base allows us the ability to review your existing roof condition and implement a Preventative Maintenance Program that is right for your specific building.
- Work is performed in a safe manner under the guidelines of a written code of safe practices. Roofing is a hazardous profession and Tip Top takes safety very seriously. We take great effort to create a safe environment for both our own employees and those working or living in the buildings you own.
- Tip Top Roofing's Customer Service program is available 24/7 ready to take action to your emergency situations when they occur.
- We offer before and after digital photography which allows you to clearly understand the scope of work that is performed on your building. Both written and visual reports regarding your Preventative Maintenance Program is available via email or USPS.
- Tip Top Roofing has the ability to assist in budget preparation and provide free proposals with recommended specifications of work for all of our clients.
